Subject: MIL-A-8625F TO MIL-PRF-8625F UPDATE

Effective Date: June 1, 2021

Dear Quality/ Engineering Department:

As of June 1, 2021 Certified Metal Finishing Inc. will be updating MIL-A-8625 to MIL-PRF-8625. Up until recently, MIL-A-8625 has not been updated since 2003. In that time, referenced documents have been updated. In 2020, based on controversy within the Aerospace Industry, the US Naval Air Systems Command for the US DOD clarify the ambiguities in the standard. The standard was renamed to MIL-PRF-8625 in line with the modern naming conventions for the US MIL Standards. PRF identified that it is a Performance Specification.

What does this mean to you, the Customer?

**Certified Metal Finishing will be quoting, process to and certifying to the latest MIL-PRF-8625F.**

*Please Note:* If you want us to certify to a previous or cancelled specification related to the “-8625”, **charges** will occur. Please feel free to contact our office within office hours. Thank you!

Sincerely,

Fred Binda  
General Manager
